

As an American citizen, I have a grave concern about the proposed Broadcast Flag. I fear it could lead more to censorship and greater government or media control over our news and information. I see the proposed Broadcast Flag as a slippery slope designed to erode not only our freedom, but also our knowledge, and we all know that knowledge is power.

We also know that this broadcast flag, will at best, deter piracy for a short time, really, if at all. What it will do is provide many ways to for a small group to control the market place.

I am not only asking to you to not support the Broadcast Flag, but to actively fight against it.
